

Subject index

Abbreviations; PN, parenteral nutrition; TPN, total parenteral nutrition

A

- Acetic acid, topical, *Pseudomonas* infection of catheter exit site and its management with, 369
- Addicts, drug, nutritional assessment and HIV infection in, 75
- Adipose tissue, glutamine metabolism in, 51
- Aged persons, zinc depletion corrected by zinc supplementation in, 29
- AIDS patients, home enteral nutrition, 287, *see also* HIV infection
- Amino acids
 - branched chain, insulin influence on peripheral uptake of, in 60-hour fasted state, 217
 - in duodenal mucosa, free, content, 266
 - glucose and fat combined with, thyroid hormone and metabolite interactions in surgery and effects of infusion of, 81
 - thyroid hormone and metabolite interactions in surgery and effects of infusion alone of, 81
- Aminotransferase, hepatic, low plasma free choline prevalence associated with abnormalities of, in long term PN patients, 33
- Ammoniogenesis, glutamine-dependent, α -ketoglutarate/ornithine/growth hormone displacing, 49
- Atropine, inhibitory effect of jejunal high caloric nutrient load on biliopancreatic secretion and the role of, 24
- Audit
 - of nutritional advice given to bone marrow transplant patients in UK/Eire, 230
 - of nutritional support provided to surgical patients by nutrition team, 310

B

- Bacteraemia, catheter, *see* Catheter
- Bacterial translocation and effects of selective bowel decontamination after burn injury, 355
- Base generation and function, renal, α -ketoglutarate/ornithine/growth hormone enhancing, 49
- Biliopancreatic secretion, inhibitory effect of jejunal high caloric nutrient load on, and the role of atropine/naloxone/nutrient solution composition, 24
- Bioelectrical impedance in prediction of reference method body composition assessment, comparison of abilities of various interpretations of, 236

- Body composition assessment, reference method, bioelectrical impedance in prediction of, comparison of abilities of various interpretations of, 236
- Bone marrow transplant patients in UK/Eire, audit of nutritional advice given to, 230
- Bowel, *see* Intestine
- Branched chain amino acids, insulin influence on peripheral uptake of, in 60-hour fasted state, 217
- Breath pentane output measurement in assessment of lipid peroxidation, 121
- Broviac catheter, silastic, occlusion as result of twisting between catheter and hub assembly, 243
- Burn injury
 - bacterial translocation and effects of selective bowel decontamination after, 355
 - ornithine α -ketoglutarate in, 70

C

- Calcium retention during TPN in preterm infants, and effects of calcium supplementation, 277
- Caloric nutrient load, jejunal high, inhibitory effect on biliopancreatic secretion of, and the role of atropine/naloxone/nutrient solution composition, 24
- Carnitine and gamma-linolenic acid-containing fat emulsion, clinical tolerance and metabolism, 168
- Catabolic patients, glutamine-enriched PN in, 65
- Catheters (for central venous nutrition)
 - bacteraemia/sepsis associated with
 - 'in situ' diagnosis, 103, 371
 - polymicrobial, with long term use, 191
 - occlusion
 - in home PN, incidence and management, 344
 - with silicone rubber (silastic) broviac catheters, as result of twisting between catheter and hub assembly, 243
 - peripheral venous catheters as substitute vs. supplement to, 213
- Pseudomonas* infection of exit site and its management with topical acetic acid, 369
- Catheters (for peripheral venous nutrition)
 - fine bore silicone rubber and polyurethane, 261
 - as substitute vs. supplement to central venous route, 213
- Central venous catheter, *see* Catheter
- Children, PN of, *see also* Neonates
- biochemical stability during, 153

- with failure to thrive, ornithine α -ketoglutarate effects in, 59
- home, vitamin bioavailability in binary mixtures stored for 8 days for, 147
- Choline, low plasma free, in long term PN patients, prevalence and association with hepatic aminotransferase abnormalities, 33
- Critically ill patients, α -ketoglutarate treatment in, 58
- Cytokine production in response to dietary fish oil supplements in volunteers, 321

D

- Defence, host, intravenous lipid emulsion and, 125
- Detsky index, validity and reliability in a Swedish setting, 15
- Diarrhoea, postoperative, soyfibre-supplemented tube feeding and its effects on occurrence of, 360
- Dipeptides, glutamine-containing, 62
- Drug addicts, nutritional assessment and HIV infection in, 75
- Duodenal mucosa, free amino acid content, 266

E

- Elderly subjects, zinc depletion corrected by zinc supplementation in, 29
- Energy expenditure, resting, in healthy young women, predicted and measured, 1
- Enteral diets/formulae/nutrition
 - home, *see* Home nutrition
 - hospital length of stay in ICU reduced by modified, 123
 - polymeric, with/without fibre supplements, bowel function and effects of, 272
 - trophic effects in rat intestine, 20

F

- Failure to thrive, paediatric patients on PN with, ornithine α -ketoglutarate effects in, 59
- Fat, *see* Lipid
- Fat-soluble vitamins A and E plasma levels in neonates after administration of two different vitamin solutions, 96
- Fatty acids
 - intravascular metabolism of different, during lipid infusion, 329
 - n3/ ω 3,
 - enteral nutrition supplemented with, lipid metabolism by intestinal mucosa of malnourished subjects following, 174
 - fish oil-supplemented lipid emulsion and incorporation into plasma lipids of, 118

- oxidation studies, with 1-¹³C- and 8-¹³C-labelled triolein, 116
- Fever response to dietary fish oil supplements in volunteers, 321
- Fibre, polymeric enteral diet with/without supplements of, bowel function and effects of, 272, *see also* Soyfibre
- Fine bore silicone rubber catheters for peripheral intravenous nutrition, 261
- Fish oils
 - fever and cytokine production in response to dietary supplements of, in volunteers, 321
 - lipid emulsions supplemented with, in experimental dog model, intravascular metabolism, 118
 - lung and the effects of, 131
- Fluid tolerance of two-compartment formulation for TPN in neonatal intensive care, 282

G

- Gamma-linolenic acid and carnitine-containing fat emulsion, clinical tolerance and metabolism, 168
- Gestation, *see* Pregnancy
- Glucose and fat combined with amino acids, thyroid hormone and metabolite interactions in surgery and effects of infusion of, 81
- Glutamate, facts and fantasies concerning, 66
- Glutamine
 - in catabolic patients, PN enriched with, 65
 - cellular exchange, mechanisms and pathophysiological implications, 53
 - dipeptides containing, 62
 - facts and fantasies concerning, 66
 - metabolism
 - in adipose tissue, 51
 - of jejunal bolus injection (of glutamine), kinetics of organ specific, 55
 - small intestine and its role in, 50
- Glutamine-dependent ammoniogenesis, α -ketoglutarate/ornithine/growth hormone displacing, 49
- Granulocyte function in nutritionally depleted patients, 2 weeks TPN and its effects on, 350
- Growth hormone
 - glutamine-dependent ammoniogenesis and renal base generation and function and effects of, 49
 - muscle catabolism and role of, post-operative, 112

H

- Hepatic diseases/function etc., *see* Liver
- HIV infection in drug addicts, nutritional assessment and, 75, *see also* AIDS

Home nutrition

enteral

- in AIDS patients, 287
- in UK, patients perspective, 208

parenteral

- catheters occlusion in, incidence and management, 344
- in children, vitamin bioavailability in binary mixtures stored for 8 days in, 147
- gestation in patient on 5 years of, normal, 43
- in UK, patients perspective, 208

- Hyperemesis gravidarum necessitating prolonged TPN, severe case of, 38

I

- Impedance, bioelectrical, in prediction of reference method body composition assessment, comparison of abilities of various interpretations of, 236
- Index (nutritional), Detsky, validity and reliability, in a Swedish setting, 15
- Infants, newborn, *see* Neonates
- Infection (PN-related)
 - Pseudomonas*, at catheter exit site, management with topical acetic acid, 369
 - taurolin in prevention of, 365
- Insulin influence on peripheral uptake of branched chain amino acids in 60-hour fasted state, 217
- Intermaxillary fixation effects on leukocyte zinc/serum trace elements/nutritional status in patients undergoing maxillofacial surgery, 223
- Internal medical disorders, nutritional status and performance capacity in patients with, 8
- Intestine (bowel)
 - decontamination, selective, bacterial translocation and effects of, after burn injury, 355
 - effects of enteral diets
 - trophic, in rat, 20
 - with/without fibre supplementation, 272
 - mucosa, *see* Mucosa
 - small, glutamine metabolism and the role of, 50
- Intralipid 30% vs. 20%, 160

J

- Jejunal bolus injection of glutamine/ α -ketoglutarate/ornithine/ornithine α -ketoglutarate, kinetics of organ specific metabolism of, 55
- Jejunal high caloric nutrient load, inhibitory effect on biliopancreatic secretion of, and the role of atropine/naloxone/nutrient solution composition, 24

K

 α -Ketoglutarate

- glutamine-dependent ammoniogenesis and renal base generation and function and effects of, 49
- jejunal bolus injection of, kinetics of organ specific metabolism of, 55
- ornithine and, metabolic interaction as basis for ornithine α -ketoglutarate action, 54
- in postoperative and critically ill patients, treatment with, 58

Kidney

- base generation and function, α -ketoglutarate/ornithine/growth hormone enhancing, 49
- failure, acute, nutritional support, 196

L

- Lactic acidosis in thiamine deficiency, 108
- Lactose and fat during pelvic radiotherapy, effects on nutritional status of diet low in, 89
- Leukocyte zinc in patients undergoing maxillofacial surgery, intermaxillary fixation effects on, 223
- γ -Linolenic acid and carnitine-containing fat emulsion, clinical tolerance and metabolism, 168
- Lipid/fat, *see also* Fat-soluble vitamins
 - amino acids combined with glucose and, thyroid hormone and metabolite interactions in surgery and effects of infusion of, 81
 - fish oil-supplemented lipid emulsion and effects on plasma and liver, 118
 - lactose and, during pelvic radiotherapy, effects on nutritional status of diet low in, 89
 - metabolism (in general), by intestinal mucosa in malnourished subjects following ω 3 fatty acid-supplemented enteral nutrition, 174
 - peroxidation, breath pentane output measurement in assessment of, 121
- Lipid/fat emulsions (in PN)
 - characterisation and physical long-term stability, 298
 - intravenous, and host defence, 125
 - metabolism
 - 1-¹³C- and 8-¹³C-labelled triolein in studies of, 116
 - clinical tolerance and, of carnitine and gamma-linolenic acid-supplemented preparation, 168
 - intravascular, of fish oil-supplemented preparations in experimental dog model, 118
 - metabolism of different fatty acids during infusion with, intravascular, 329
 - new concentrated, 160
- Lipofundin MCT/LCT, characterisation and physical long-term stability, 298

Lipoproteins, fish oil-supplemented lipid emulsion and effects on plasma and liver, 118

Liver (hepatic)

aminotransferase, low plasma free choline prevalence associated with abnormalities of, in long term PN patients, 33

disease, habitual pattern of food intake in patients with, 293

lipid/lipoproteins, fish oil-supplemented lipid emulsion and effects on, 118

Lung, fish oils and the, 131

Lymphocyte function in nutritionally depleted patients, 2 weeks TPN and its effects on, 350

M

Malnourished subjects following $\omega 3$ fatty acid-supplemented enteral nutrition, lipid metabolism by intestinal mucosa of, 174

Maxillofacial surgery, intermaxillary fixation effects on leukocyte zinc/serum trace elements/nutritional status in patients undergoing, 223

Methionine sulfoximine effects on net muscle protein breakdown in rats, 182

Mucosa (intestinal)

duodenal, free amino acid content, 266

in malnourished subjects following $\omega 3$ fatty acid-supplemented enteral nutrition, lipid metabolism by, 174

Multiple organ failure, thermogenic response to TPN in depleted patients with, 253

Muscle

catabolism, and role of human growth hormone, postoperative, 112

protein, methionine sulfoximine effects on net breakdown of, in rats, 182

N

^{15}N tracer substances in whole body protein analysis in premature infants, 114

$n 3$ fatty acids, *see* Fatty acids

Naloxone, inhibitory effect of jejunal high caloric nutrient load on biliopancreatic secretion and the role of, 24

Neonates/newborn infants

plasma levels of vitamins A and E in neonates after administration of two different vitamin solutions in, 96

preterm/premature

calcium and phosphorus retention during TPN in, and effects of organic/inorganic phosphate supplementation, 277

whole body protein parameters in: comparison of

different ^{15}N tracer substances and different methods, 114

two-compartment formulation for TPN in intensive care, 282

Newborn, *see* Neonates

^{15}N Nitrogen tracer substances in whole body protein analysis in premature infants, 114

O

$\omega 3$ fatty acids, *see* Fatty acids

Ornithine

glutamine-dependent ammoniogenesis and renal base generation and function and effects of, 49

jejunal bolus injection of, kinetics of organ specific metabolism of, 55

α -ketoglutarate and, metabolic interaction as basis for ornithine α -ketoglutarate action, 54

Ornithine α -ketoglutarate

in burn injury, 70

jejunal bolus injection of, kinetics of organ specific metabolism of, 55

α -ketoglutarate and ornithine metabolic interactions as basis for action of, 54

in paediatric patients on PN with failure to thrive, 59

in trauma, 61

P

Paediatric patients, *see* Children; Neonates

Parenteral nutrition

in children, *see* Children

choline prevalence and association with hepatic aminotransferase abnormalities in recipient of long term, low plasma free, 33

glutamine-enriched, in catabolic patients, 65

home, *see* Home nutrition

infection associated with, *see* Infection

lipid emulsions for, *see* Lipid emulsions

neonatal, *see* Neonates

terminology, 317

total

hyperemesis gravidarum necessitating prolonged, severe case of, 38

lymphocyte and granulocyte function and effects of, in nutritionally depleted patients, 350

by peripheral vein, *see* Catheters

thermogenic response to, in depleted patients with multiple organ failure, 253

Pelvic radiotherapy, effects on nutritional status of low fat/low lactose diet during, 89

Pentane, exhaled, measurement in assessment of lipid peroxidation, 121

- Peripheral venous TPN, *see* Catheters
- Peroxidation, lipid, breath pentane output measurement in assessment of, 121
- Phosphoenolpyruvate-carboxykinase, orally administered $1\text{-}^{13}\text{C}$ - and $8\text{-}^{13}\text{C}$ -labelled triolein in postprandial humans and effects of, on $^{13}\text{CO}_2$ recovery, 337
- Phosphorus retention during TPN in preterm infants, and effects of organic/inorganic phosphate supplementation, 277
- Polymeric enteral diet with/without fibre supplements, bowel function and effects of, 272
- Polyurethane catheters for peripheral intravenous nutrition, 261
- Postoperative patients
dietary supplements in, short term benefits, 246
 α -ketoglutarate treatment in, 58
- Pregnancy
in patient on 5 years of home PN, normal, 43
vomiting in, necessitating prolonged TPN, severe case of, 38
- Premature infants, whole body protein parameters in: comparison of different ^{15}N tracer substances and different methods, 114
- Preterm infants, *see* Neonates
- Protein
muscle, methionine sulfoximine effects on net breakdown of, in rats, 182
whole body, in premature infants: comparison of different ^{15}N tracer substances and different methods of analysis, 114
- Pseudomonas* infection of catheter exit site and its management with topical acetic acid, 369
- Pyrexia response to dietary fish oil supplements in volunteers, 321
- Pyroglutamate, facts and fantasies concerning, 66

R

- Radiotherapy, pelvic, effects on nutritional status of low fat/low lactose diet during, 89
- Renal issues, *see* Kidney

S

- Sepsis, catheter, *see* Catheter
- Serum trace elements in patients undergoing maxillofacial surgery, intermaxillary fixation effects on, 223
- Silicone rubber catheters, *see* Catheters
- Solutions, nutrient, inhibitory effect of jejunal high caloric

nutrient load on biliopancreatic secretion and the composition of, 24

- Soyfibre-supplemented tube feeding, postoperative diarrhoea occurrence and effects of, 360
- Swedish setting, Detsky index validity and reliability in a, 15

T

- Taurolin in prevention of PN-related infection, 365
- Thermogenic response to TPN in depleted patients with multiple organ failure, 253
- Thiamine deficiency, lactic acidosis in, 108
- Thrive, failure to, paediatric patients on PN with, ornithine α -ketoglutarate effects in, 59
- Thyroid hormone in surgery, effects of infusion of amino acids combined with glucose and fat on, 81
- Trace elements, serum, in patients undergoing maxillofacial surgery, intermaxillary fixation effects on, 223
- Trauma, ornithine α -ketoglutarate, 61
- Triolein, $1\text{-}^{13}\text{C}$ - and $8\text{-}^{13}\text{C}$ -labelled
fatty acids oxidation studies employing, parenteral fat emulsion metabolism and, 116
orally administered in postprandial humans, different $^{13}\text{CO}_2$ recovery of, 337
- Trophic effects of enteral diets in rat intestine, 20
- Tube feeding, soyfibre-supplemented, postoperative diarrhoea occurrence and effects of, 360

V

- Venous catheters, *see* Catheter
- Vitamin(s), bioavailability in binary mixtures stored for 8 days in children on home PN, 147
- Vitamin B₁ (thiamine) deficiency, lactic acidosis in, 108
- Vitamin solutions, plasma levels of vitamins A and E in neonates after administration of two different, 96

W

- Women, healthy young, resting energy expenditure in, predicted and measured, 1

Z

- Zinc
in elderly subjects, supplements correcting depletion, 29
leukocyte, in patients undergoing maxillofacial surgery, intermaxillary fixation effects on, 223
